The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 32-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jansen (6,129,083) in view of Burger et al (4,619,271).

Jansen discloses an article of clothing that includes an extension (18) that is inserted into a bodily orifice to secure the device in place. Jansen discloses the claimed device except for a hygienic cover over the extension. Burger et al discloses a device (19) that is inserted into a bodily orifice and teaches that it is well known to use a hygienic cover (19a) with the device to provide for proper hygiene when inserting things into a bodily orifice and prevent any contamination or spread of germs and/or disease. Therefore a modification of Jansen to include a hygienic cover over the extension would have been obvious in view of Burger et al since this would allow for a more hygienic use of the device. With respect to claim 34, while Jansen does not specifically disclose the extension or securing part being inserted into a woman's vagina to secure the device, it would have been obvious to one skilled in the art at the time the invention was made to use any orifice to secure the device in place. Therefore a modification of Jansen to allow the securing part to be inserted into a vagina to secure the device would have been obvious. Further to include two extensions or securing parts would have been obvious since this would allow for the device to be more Secure than only using one.

2. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claim 35 is rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 1 of prior U.S. Patent No. 6,832,983. This is a double patenting rejection.

Applicant's arguments filed 11/19/07 have been fully considered but they are not persuasive. Applicant argues that the extension of Jansen is expressly for the purpose of preventing misalignment, however the examiner's position is that this is not the case. In fact Jansen refers to element (4) as a securing means and states that "the securing part 4 substantially takes care of holding the device in place on the body" (column 4, lines 40-41), which clearly teaches that the element is used to secure the device and not merely prevent misalignment. Further such an argument is directed to the intended

use of the device and the structure of Jansen meets the claimed structure and is clearly capable of performing the claimed functions. .

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
